

Paediatric Elastic Wrist Brace

The Paediatric Elastic Wrist Brace combines support and fun thanks to the bright and colourful design. The splint supports and immobilises the wrist, but allows full movement of the fingers and thumb, making it comfortable to wear while providing the support and protection that injuries require to heal.

Provides wrist and thumb support for an array of injuries, conditions, pre-and post-operations such as:

- + Arthritis
- + Sprains and strains
- + Soft tissue injuries and conditions
- + Instability
- + Post fracture management

Colourful, attractive and cheerful design made from a supportive, single compression elastic material. Slip-on D-ring closure straps makes putting it on easy.

Rigid palmar bar across the back of the wrist for extra support, helps distribute weight more evenly, reducing pain
