

Elastic Thumb Spica - Modified

Providing protection, support and comfort while your thumb heals, the Elastic Thumb Spica - Modified is made from highly breathable fabric that prevents moisture build-up, leaving your hand feeling fresh all day. The elastic material imparts a gentle compression to the injured area, improving circulation and helping to reduce swelling.

Provides wrist and thumb support for an array of injuries, conditions, pre-and post-operations such as:

- + Arthritis
- + Osteoarthritis
- + Rheumatoid Arthritis
- + Arthritis of the thumb
- + Basal joint arthritis
- + CMC arthritis
- + Juvenile chronic arthritis
- + CMC instability
- + De Quervain's syndrome
- + Gamekeeper's thumb
- + Inflamed/swollen tendons
- + Overuse injuries
- + Post traumatic conditions
- + Repetitive strain injury

The lightweight design leaves the palm and fingers free to assist with everyday tasks.

Convenient hook / loop closures make it easy to adjust the support, and are ideal for users with limited dexterity.

Removable, flexible thumb stay restricts movement at the CMC and MCP joints for accelerated healing.
