

Intrinsic Wrist Brace

Padded elastic wrist brace with a full-length adjustable aluminium resting splint. The splint is wide enough to contain all four fingers and can be easily adjusted to hold the wrist and fingers in the desired position.

There is a wide, padded adjustable dorsal closure strap that can be used to hold the fingers in position. Ideal for injuries, arthritis, RSI and much more.

- + Osteoarthritis
- + Post carpal/metacarpal surgery
- + Supports CMC/MCP joints
- + Flaccid paralysis
- + Flexor tendon injury
