

# Jura CMC

The Jura CMC is thumb orthosis which provides adjustable support to the thumb carpometacarpal (CMC) joint. Inner mouldable aluminium stay offers extra support and stability of the base of the thumb.

Provides wrist and thumb support for an array of injuries, conditions, pre-and post-operations such as:

- + Osteoarthritis of the CMC joint
- + Postoperative treatment of the CMC joint
- + Instability of the CMC joint

Easy to apply and adjust with simple straps.

Inner mouldable aluminium stay offers extra support and stability of thumb

Ergonomic frame provides superior support and excellent comfort of CMC joint
