

# Paediatric Thumb Spica

Providing adequate support is crucial to the healing process, whether from surgery, arthritic condition or an injury. The Paediatric Thumb Spica includes a flexible splint to provide thumb stabilisation and is made from comfortable, breathable Lycrafleece material.

Provides wrist and thumb support for an array of injuries, conditions, pre-and post-operations such as:

- + Arthritis
- + Sprains and strains
- + Soft tissue injuries and conditions
- + Instability

Specially made Lycrafleece material is durable, breathable and comfortable, with a bright and colourful look designed specifically for children.

The design keeps the palm and fingers free for improved comfort and mobility.

The flexible splint provides excellent thumb support.
