

Pro-rheuma Wrist Thumb Brace

Made from a breathable high compression material with microfleece lining. Easy slip-on design with D-ring closure straps. This brace is very comfortable and excellent for patients with limited dexterity, such as osteoarthritis and wrist instability. Supplied with medium stability plastic palmar support which can be heat moulded. Semi-flexible stay provides thumb abduction and support to CMC and MCP joints. Available in beige and black.

Provides wrist and thumb support for an array of injuries, conditions, pre-and post-operations such as:

- + Arthritis
- + Sprains and strains
- + Soft tissue injuries and conditions
- + Instability
- + Slide-on design with D-ring closures allow easy application especially for patients with reduced dexterity

Breathable, high compression material with microfleece for both comfort and support.

Medium stability palmar support can be moulded to fit perfectly. This semi-flexible stay provides excellent support to the joints.

Slip-on D-ring closure straps makes putting it on easy.
