

Liberty[™] Elastic Short Wrist Splint

The Liberty[™] Elastic Short Wrist Brace allows the fingers and thumb to move freely while providing excellent wrist support. Ideal when a shorter length support is needed. Made of woven cotton and coated rubber. Measuring at 18cm in length, the short style covers approximately one-third of the forearm.

Provides wrist and thumb support for an array of injuries, conditions, pre-and post-operations such as:

- + Arthritis
- + Inflammation
- + Sprains
- + Strains
- + Carpal tunnel syndrome

Measuring at 18cm in length, the short style covers approximately one-third of the forearm. Ideal when a shorter length support is needed.

Unique cutout in the aluminum stay allows for unimpeded range of motion of the thumb.
