

Promedics Thumb Shield

A Neoprene wrist/thumb wrap with adjustable cinch strap and removable thermoplastic insert. The cinch strap allows greater compression at the site of the pain, without complete immobilisation.

The thermoplastic insert, made from Orfit NS 2.0mm, increases the support at the MCP joint and can be removed and remoulded as required.

Provides wrist and thumb support for an array of injuries, conditions, pre-and post-operations such as:

- + Arthritis
- + CMC instability
- + De Quervain's syndrome
- + Gamekeeper's thumb
- + Inflamed/swollen tendons
- + Overuse injuries
- + Post carpal/metacarpal surgery
- + Post-traumatic conditions
- + Repetitive strain injury
- + Rhizarthrosis
- + Scapholunate instability/tear
- + Severe CMC arthrosis
- + Skier's thumb
- + Soft tissue injury
- + Sprained wrist
- + Stener lesion
- + Thumb basal joint instability
- + Thumb basal joint/saddle joint irritation
- + UCL injury / lesion
- + Weakness of the thumb joint
- + Worn cartilage

Made with Neoprene for comfortable wear that feels good against the skin. It also provides circumferential compression, helping to improve circulation and reduce swelling.

The thermoplastic insert increases the support at the MCP joint and can be removed and remoulded as required, for a personalised product.
