

# Air X Thumb Spica

Adjustable thumb Spica offering support around the wrist, MCP and CMC joints. AirX offers improved properties.

The unique AirX fabric has the ability to transport moisture efficiently away from the body. The layering of fibre structures promotes a moisture wicking process, which results in a dry comfortable feeling to the surface of the skin so that body always feels fresh and dry. AirX gives the body optimal freedom to breathe reduces the risk of skin maceration which results in improved patient compliance.

- + Breathable
- + Vapour transfer for reduced moisture
- + Skin friendly
- + Comfort, compression & conforms

Moisture wicking,  
breathable fabric

Accommodates swelling  
due to elasticated fabric
