

Ventilated Thumb Restricted Splint

A ventilated, low profile wrap around support providing adjustable support for the thumb CMC joint. The shaped strap wraps around the thumb CMC joint and the first metacarpal for targeted CMC joint support. An extensive size range covers paediatric to adult sizes and plus sizes are a full size bigger in thumb circumference to fit oedematous thumb conditions. Function and fit without bulk.

- + CMC joint arthritis
- + CMC joint instability
- + Tendonitis
